# Planning for Learning on a BISD Field Trip

Any learning experience must be tied to the BISD grade level curriculum and include pre, during, and post activities. Here are some suggested activities:

### Preparing students before the trip:

- 1. Discuss the purpose of the trip and how it related to the standards.
- 2. Introduce vocabulary words that will be used by docents during the field trip.
- 3. Show photographs or posters of the field trip site or related exhibits that will be viewed.
- 4. Explore the Website of the location you will be visiting.
- 5. Discuss with students how to ask good questions and brainstorm a list of open-ended observation questions to gather during the field trip.

### Activity suggestions that might be appropriate during the trip:

- 1. Students complete sketch pages with partial drawings of objects found in exhibits for students to complete the drawings based on their observations.
- 2. Students complete field notebooks for recording answers to prepared questions.
- 3. Students complete hand drawn postcards to write near the end of the tour that will summarize the field trip visit.

#### Follow up activities after the trip:

- 1. Provide time for students to ask questions, record key words, ideas and phrases as journal entries.
- 2. Provide time for students to share general observations and reactions to the field trip
- 3. Create a classroom bulletin board displaying materials developed or collected while on the field trip
- 4. Develop a classroom museum that replicates and extends displays students observed on the field trip.
- 5. Develop a vocabulary list based on field trip observations
- 6. Complete math problems related to the actual field trip
- 7. Have the class compose and send thank-you letters to the field trip site host, chaperones, school administrators and other persons that support the field trip. Include favorite objects or special information learned during the field trip.
- 8. Create a short news report about what happened on the field trip. Publicize the trip via class Web page.
